The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flux '456 in fig.1 in view of Flux '456 in fig.10. Flux in fig. 1 shows the claimed device with the exception of the notch. Flux in fig 10 shows a notch at the inner wall surfaces of element 301 and 302 adjacent the space 350, for receiving an elongate member. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify fig.1 to comprise a notch, as taught in fig. 10, to facilitate seating of the elongate member. (see enclosed mark up portion of fig. 10 showing the location of the notch)

Claims 7,8,12 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
